### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:
2. Regarding Claim 14, as shown in the prior Office action, US Patent 5,732,334 to Miyake discloses a method and apparatus for transmitter power control (Fig. 2) determines an error value by comparing reference power data that corresponds to the transmit bias control value claimed with sampled power data that corresponds to the transmitter output level claimed and adding the error data to reference control data to produce a power control signal. However, Miyake does not disclose saving the error value from one transmitter output level and applying it to a different transmitter output level as claimed. Similarly, US Patent 5,323,329 to Keane and US Patent 6,304,749 to Obara disclose in their respective Figs. 1, radio transmitter power control methods and apparatuses that derive a correction value by comparing a target output with an actual output and adding the correction value to a control value. Again, however, they do not disclose saving the error value from one transmitter output level and applying it to a different transmitter output level as claimed. Since the prior art fails to disclose or fairly suggest all elements of the claimed invention, Claim 14 is allowable.
3. Claims 15, 20, 30 and 33 contains limitations similar to those of Claim 14 and are allowable for the same reasons.
4. The remaining pending claims (i.e., Claims 5 through 12, 21 through 28, 31 and 32) are allowable due to dependence from their respective base claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Drawings***

5. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings submitted are not of suitable quality for reproduction. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
